No one will deny that Gen. Garfield is a smart man. Whatever else he may be accused of, no one has ever called him a fool or depreciated his talents. He excels his predecessor in every quality that goes to make up a man and statesman. No matter what may be said of him, he occupies the presidential chair by virtue of an election by the his predecessor did. If his administration fails in any particular, it and of his advisers than of his head or his want of capacity and ability. His inaugural address is clear, succinct and generally pleasing in its composition. This is nothing more than what the country expected of a man of his literary attainments. As an oratorical work it far surpasses anything of the kind the country has had for years.

We have not the space to analyze his address or to dwell in detail upon the theories he therein promulgates. It is in the carrying out of those careful and thoughtfully prepared of its chief executive head. It is a Indian, the patent office, the pension their home, in Ohio, from Washplain, practical work, and requires cannot say that his address gives us though we do not agree with him and his party in their ideas of government, still, as citizens of that government, we hope that his administration will be fair and equitable to all sections, and that the country may be prosperous under it. No good citizen could hope less.
